

Club of the Year

Competitive Programming Club

Selected by the Associated Student Government

This year's recipient for Club of the Year is the Competitive Programming Club. This club was chosen because of their variety of activities for the Santa Barbara City College student body. Included among these were job interview workshops, International Collegiate Programming Competitions and lectures covering an array of topics. The ASG recognizes that this club connected with students in a challenging time. They demonstrated diverse outreach and excelled in bringing SBCC students together in an extraordinary academic year. They are to be praised for their accomplishments and success. Congratulations!
